

# ServiceNow Practice

## Rely On Our ServiceNow® Team To Integrate Complex Systems

As a business grows and changes, workflows need to be updated and can become more complex. Legacy systems are often too cumbersome to be adaptable, which means costly upgrades. With the ServiceNow platform, it is easy to standardize service delivery and automate workflows. Making the processes simple and easy to use means increased productivity, reduced redundancy, reliable metrics and more profitability. As a ServiceNow Premier level partner in sales, services and the public sector, we help companies that are looking to advance in areas such as customer service, human resources, leadership, governance and IT.

## Transform How Your Business Operates

Ventech Solutions uses Agile and SAFe best practices to design, deliver, implement and manage solutions through the ServiceNow platform. Our experience with the Customer Service Management (CSM), IT Business Management (ITBM), IT Service Management (ITSM), and IT Operations Management (ITOM) products provides specific or integrated solutions that include improved customer service, robust reporting with performance analytics and increased capacity through intelligent automation.

We partner with you to achieve your specific business objectives. Starting with one or more core modules, we help you address the key service areas impacting your organization's ability to plan, execute, track and report with data-driven results. Best practice methods and ITIL-based processes are tailored to meet your unique needs. The results deliver a consistent approach to managing service desks, data center operations and management, employee and customer service experience and other business and IT management focus areas.
