

## Your IT Success Partner

In today's hyper-competitive global economy, the right information technology is a critical success factor. To stay ahead, it is necessary to have an IT partner that combines uncommon understanding of current and emerging technologies with the business insight to make them work for you.

In business since 1994, Ventech Solutions has built a stable and loyal client base by delivering the promised scope of work — on time, on budget and within the highest security and quality standards. As the first and only SBA 8(A) certified CMMI Maturity Level 5 software company, Ventech has unique credentials for meeting public and private-sector supplier diversity procurement goals. Our satisfied clients include Global 2000 corporations as well as federal, state and local government agencies in a dozen states and the District of Columbia.

The world's first CMMI Maturity Level 5 (v 1.2) software company, Ventech brings best practices in software development to bear in solving your most pressing operational and strategic challenges. Our development portfolio includes three generally available software packages as well as numerous custom applications for the healthcare, education, insurance, financial, government, manufacturing and retail vertical markets.

Ventech's services, solutions and products are designed to maximize return on your IT investment and sharpen your competitive edge. Whether you require a qualified professional for your IT department or a custom IT solution to a critical business problem, Ventech has the right people, processes and technology.

### Services

**IT Professional Staffing** - Contract Consulting, Contract to Hire and Permanent Placement of qualified IT professionals.

**Website and Portal Development** - Front-end and back-end development of highly usable Web applications employing the latest tools.

**Independent Verification & Validation (IV&V)** Evaluation of an application's effectiveness and usability by IV&V experts using proven processes and methodologies.

### Solutions

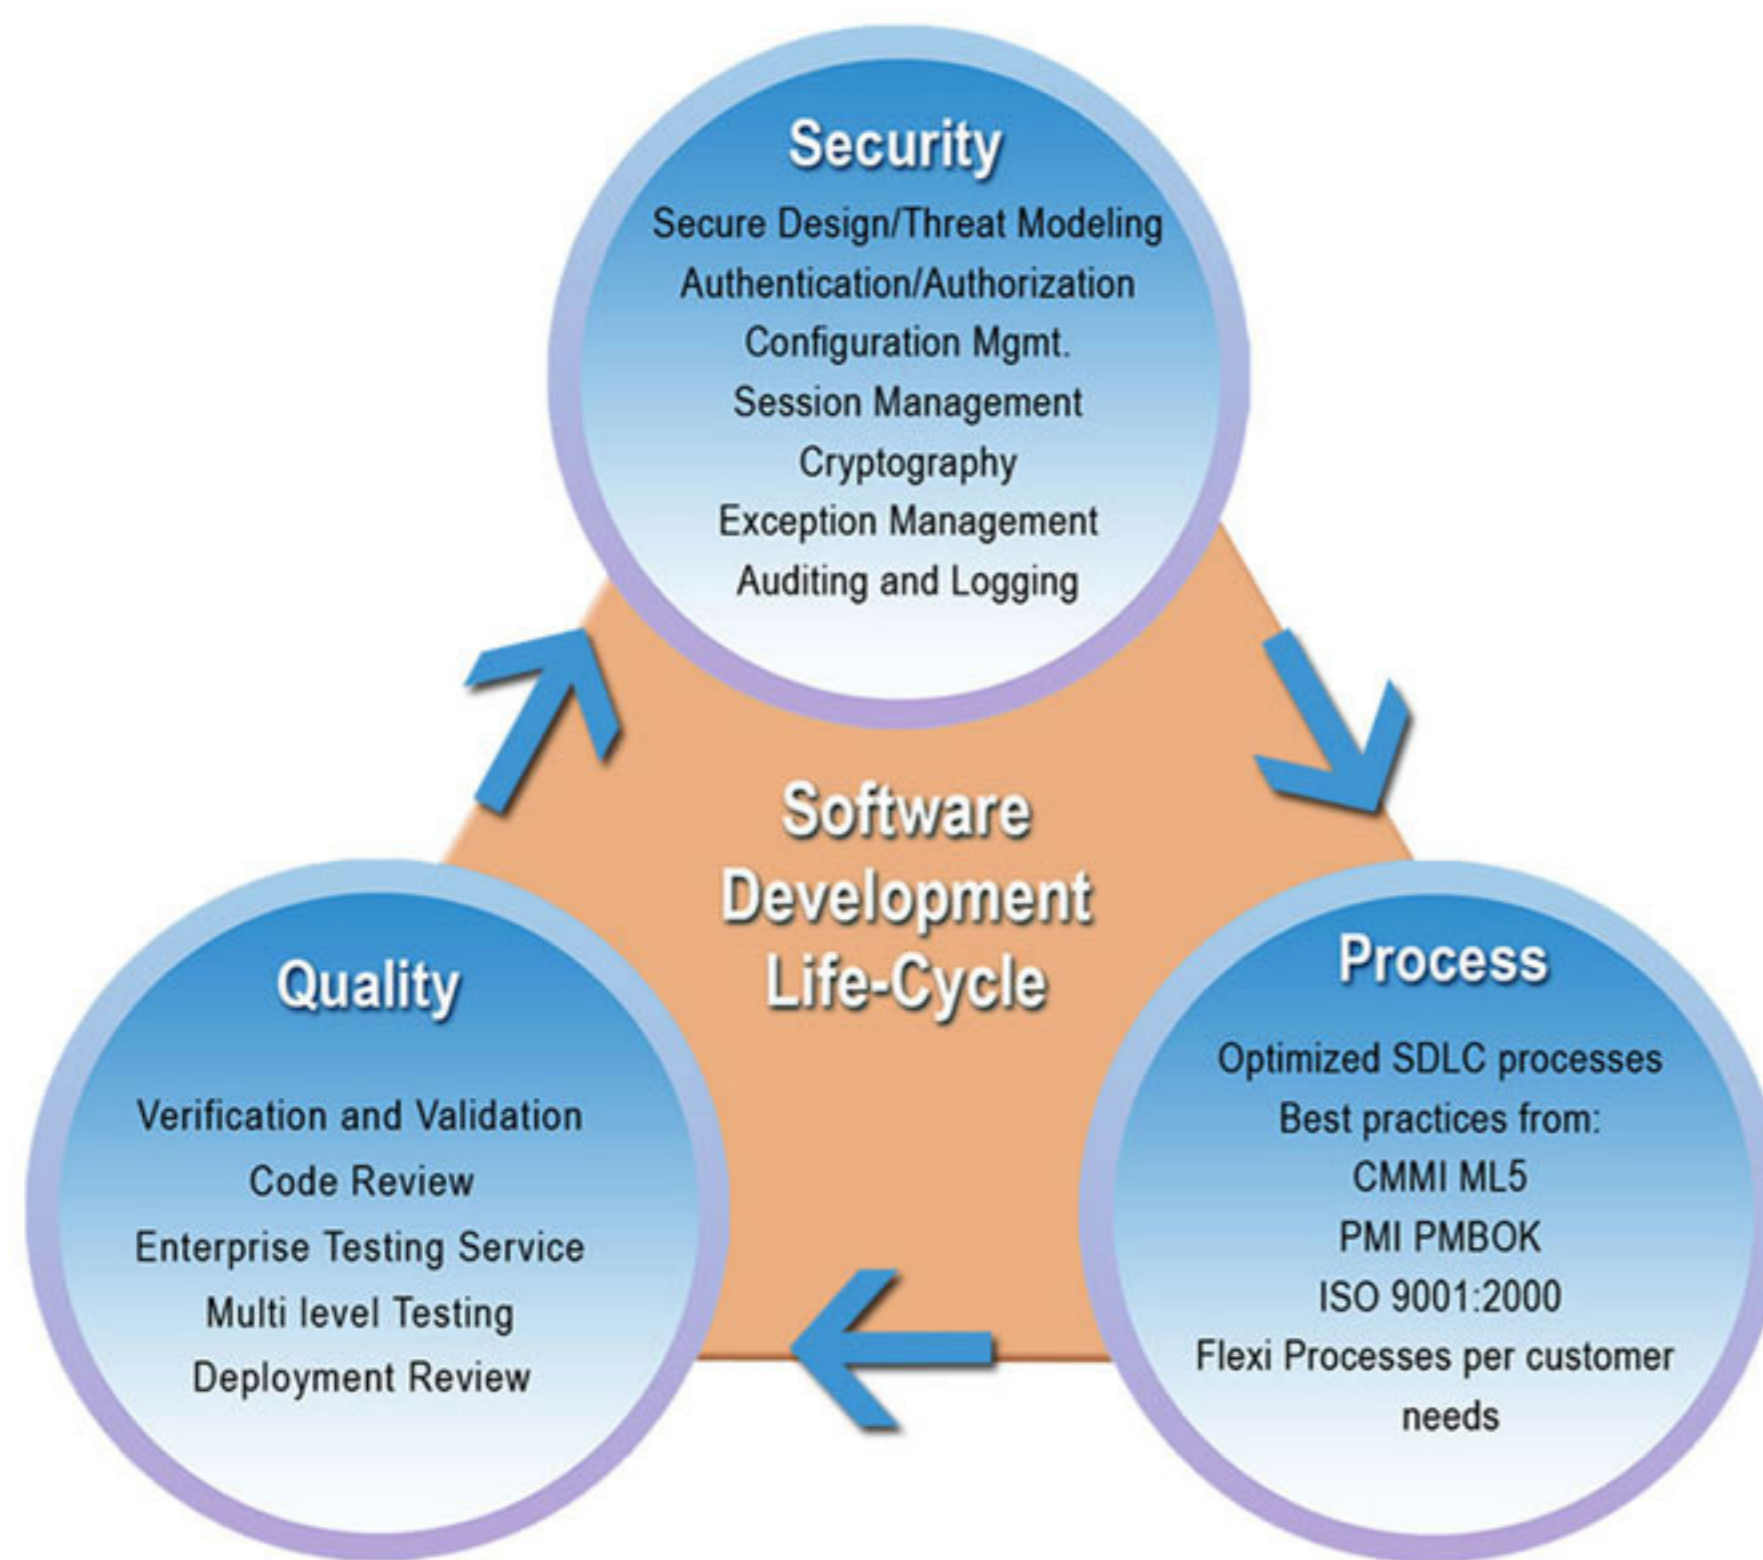

**Project Management** - Ventech ensures the success of your project by aligning project goals with business objectives. By ensuring accountability, managing resources effectively, and improving communication and Business-IT alignment, Ventech reduces project risk while maximizing the value of IT investments.

**Testing and Quality Assurance** - Ventech's end-to-end testing solutions include planning, process control, test automation, test execution, defect tracking and reporting. Our extensive testing experience, deep industry knowledge and expertise with various testing tools combine to help you accelerate testing, reduce time to market, ensure high testing quality, lower costs and focus on strategic priorities.

**Secure Application Development** - Ventech's highly mature software development process delivers applications with the best possible balance of speed, quality and cost. Applying 3,000 person-years of experience in a three-pronged SDLC approach (as shown below), we consistently create applications that meet our clients' project scope within the highest security and quality parameters.
